

Peacock Feather Scarf

This bright coloured scarf is a well done needlework for every peacock fan!
It is made of “Cora”, a fabric by the yarn factory ONLINE and each ball consists of 50gr and 85mtrs.

I used **2 balls of black**, **1 ball of brown/beige**, **1 ball of light green**, **1 ball of light turquoise**, **3 balls of blue**, and **3 balls of a dark teal**.

I took a needle No. 3,5 for the peacock eyes and a needle No. 6 for crocheting the scarf and the **finished scarf weighs about 480gr**.

The Peacock Eyes (18 pieces)

(My advise is to crochet all of them at one time and to always weave in all the yarn ends)

Start with black: Work a magic ring with 3 chain stitches and 15 double crochets. Tighten your work and slip stitch into the first stitch.

Turn into blue: begin with 2 chain stitches and increase by placing 2 half double crochets in each stitch around. Now slip stitch into the second chain stitch of your round.

Now turn into light turquoise: Start with 2 chain stitches. Half double crochet in each stitch around and duplicate every fourth stitch. Place the last 6 stitches in the centre of your work, this will need some practice
Slip stitch into the second chain stitch.

Turn into brown/beige: Look at the picture below. Start in the middle of the 6 last rounds ending stitches. Place 12 single crochets into the stitches around, continue with half double crochets like seen in the picture below. After that double crochet around the stitches and increase like seen in the picture. Take a good look! Now continue like seen in the picture downwards your eye and end your work with 12 single crochets and slip stitch into the first stitch.

Turn into light green and single crochet in each stitch around. Slip stitch in first stitch.

Turn into dark teal: Start again in the middle above the turquoise central stitches. Single crochet until you reach the brown double crochets of your last round. Work a picot of 2 chain stitches, two single crochets, a picot of 3 chain stitches, again two single crochets and repeat it by increasing your picots with chain stitches until you reached a picot of 7 chain stitches, which should be placed in the middle towards your centre stitches. Now work downwards descending your stitches backwards, like you can see in the picture. (Picot of 7 chain stitches, 6 chain stitches a.s.o.) Take a look at the picture below, there you will see how it is meant. Slip stitch into the first stitch.

That was the first peacock eye. The following will be crocheted **into** the eyes made before! In your dark teal coloured round, you stitch your least 4 single crochets (before your picots are coming) into the single crochets after the picots of the last eye (one from below, one from above, one from below, one from above). I crafted a chain of 18 peacock eyes for the scarf.

The Scarf

Start with black: Work a magic ring with 3 chain stitches and 8 double crochets. Tighten your work.

Begin the next row with 3 turning chain stitches and duplicate each stitch with double crochets. Now you have 18 stitches.

The third row will be 3 turning chain stitches and 17 double crochets with 1 chain stitch between the double crochets.

Now start again with 3 turning chain stitches, double crochet in each double of the last round but place 3 chain stitches between every double crochet and duplicate every fourth double crochet. You will see them forming a “V” each.

Start the fifth row with 3 turning chain stitches. Work even with 1 chain stitch between each duplicated double crochet. That will look like an upside down “V”
It shall be 18 V's now, but don't panic, if there is one more or less! You just have to adjust the number of peacock eyes (1 V later will fit into 1 peacock eye)

Now work one row even again but work 1 chain stitch between every V

The seventh row will be started with 3 turning chain stitches. Then continue with 1 double crochet and 1 chain stitch, followed by 2 double crochets and now place 2 double crochets, 1 chain stitch and again 2 double crochets in each of your V's

Start the eighth row with 3 turning chain stitches, then 1 double crochet, 1 chain stitch and 2 double crochets AND 1 chain stitch. And now put into each V 2 double crochets, 1 chain stitch, 2 double crochets AND 1 chain stitch.

Continue with 3 turning chain stitches, 2 double crochets, 1 chain stitch, 3 double crochets and then continue with 3 double crochets, 1 chain stitch and 3 double crochets into each V.

Now work even with 1 more chain stitch between every package.

Turn into blue: Start with 3 turning chain stitches, continue with 3 double crochets, 1 chain stitch and 4 double crochets. Then work 4 double crochets, 1 chain stitch and 4 double crochets into each V.

Now work even again with 1 chain stitch between every package

The thirteenth row starts with 3 turning chain stitches, 3 double crochets, 1 chain stitch and 4 double crochets, but now continue with 2 chain stitches! Repeat it so in the end it will be 18 times: 4 double crochets, 1 chain stitch, 4 double crochets and 2 chain stitches between.

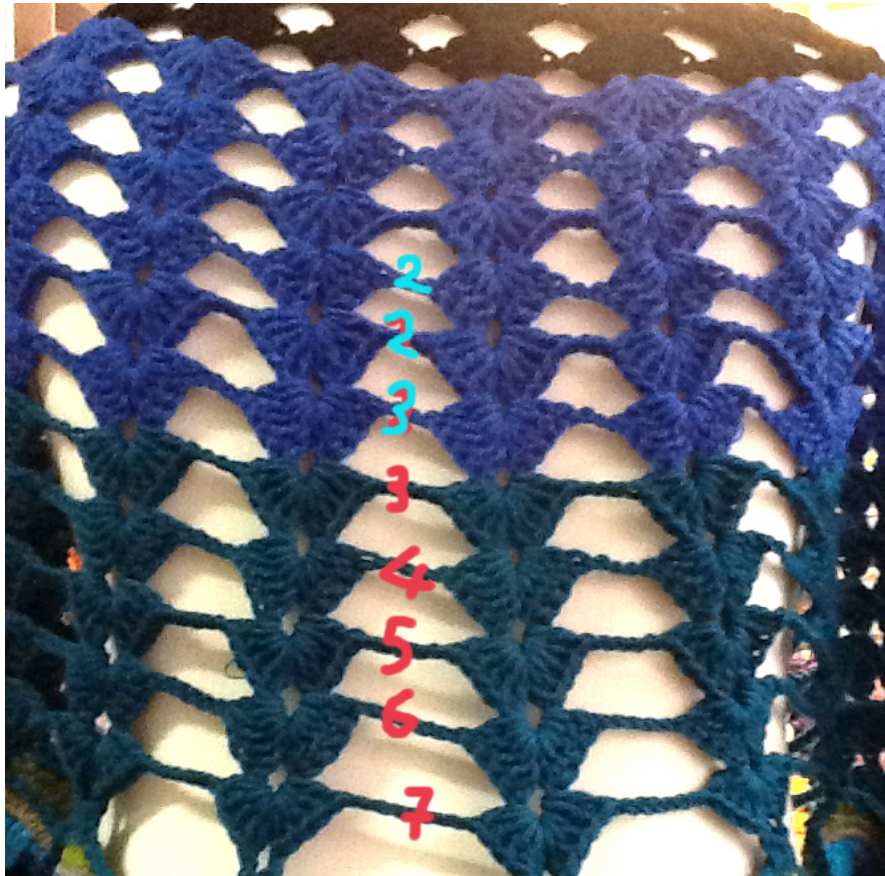

Start this row like the last one but place 2 chain stitches into every package of double crochets. So it will be 18 times: 4 double crochets, 2 chain stitches, 4 double crochets and again 2 chain stitches.

The fifteenth row starts with 3 turning chain stitches, 4 double crochets, 2 chain stitches and now 5 double crochets and again 2 chain stitches. Continue every package with 5 double crochets, 2 chain stitches, 5 double crochets and then again 2 chain stitches between each package.

Work even again but place 3 chain stitches between each package. So it will be 18 times: 5 double crochets, 2 chain stitches, 5 double crochets and then 3 chain stitches.

Turn into dark teal: Repeat the last row three times, but place 1 more chain stitch between every package. So the length of the chain space will increase each row like seen in the picture until you have 5 double crochets, 2 chain stitches, 5 double crochets and then 6 chain stitches

Now start your last row, but beware! Your chain space has to consist of 7 chain stitches now and instead of crocheting 2 chain stitches between your double crochets, you have to join the peacock eyes now. You can see it in the following pictures.

Put the peacock eye chain near your scarf.

Start with 3 turning chain stitches and 4 double crochets. Then instead of 2 chain stitches join 1 peacock eye with 3 single crochets. Continue with 5 double crochets and then 7 chain stitches. Now repeat 17 times: 5 double crochets, join the peacock eye with 3 single crochets, 5 double crochets, 7 chain stitches.

At the end you can border your work with coloured fringes.
I made each fringe out of 2 different colours.

You made it! Congratulations! Now have fun with your beautiful needlework.

**Woolly greetings from Munich,
Petra Perle**

I would appreciate a subscription and a positive feedback!

Just a last advise: It is not very difficult to crochet the scarf, **from the third row** you just have to increase by 18 stitches each round.

Good luck and success!

Adios

Perle
